I would give 5 stars, but the app only allowed me, 4. the service was so great! my water was never empty before it was filled again and we didn't have to wait long for eating. Before my friend ended his rams, he was asked if he would just want \$1 more. I really like it that this is an option. the rams were by far the best rams I had. I have the classic vegan rams and my friend got the spicy. [View all feedback](#). What [User](#) doesn't like about Ramen Danbo: Definitely not the best vegan ramen I've ever but it was decent for a decent price. I had the vegan miso ramen with everything the standard option. I found the broth wayyy to salty and the noodle very subpar. I do plan on going back and trying a different style vegan ramen with noodles cooked more but won't wait in a line to do so.
